

2022 Spring Semester COVID-19 Quarantine/Self-Isolation Guidelines

Vaccinated individuals:

- Individuals who have been fully vaccinated (primary and booster / 3rd shot) and have had close contact (within 6 feet for more than 15 minutes) with someone with COVID-19 should test at least 5 days after the exposure and continue to wear a well-fitting mask indoors. However, they do not need to quarantine UNLESS they become symptomatic OR their test comes back positive.
- Vaccinated individuals who test positive must quarantine for 5 days regardless of whether they are symptomatic or not, and continue to wear a well-fitted mask around others for 5 additional days, able to return assuming no fevers for 24-hours without the use of fever-reducing medications and other symptoms are improving.

Non-Vaccinated individuals:

- Individuals who are not vaccinated and have had a close contact (within 6 feet for more than 15 minutes) with someone with COVID-19 should test at least 5 days after the exposure and MUST quarantine for 5 days after the exposure REGARDLESS of their test result.

Any individual:

- Any individual who is experiencing COVID-19 symptoms should be tested and quarantine until they receive their test results.

For detailed information visit the [TMCC COVID-19 Quarantine/Self Isolation Guidelines](#) or contact EHS at 775-674-7951.

Vaccinated		Non-Vaccinated	
These quarantine guidelines apply to those who have completed the primary series of the recommended vaccine, and received the booster shot.		These quarantine guidelines apply to those who have not completed the primary series of the recommended vaccine, and / or received the booster shot.	
Specific Infection/Exposure Scenarios	Quarantine/Self-Isolation Requirements	Specific Infection/Exposure Scenarios	Quarantine/Self-Isolation Requirements
Vaccinated - close contact, asymptomatic, waiting test	No, wear mask in public settings until result received	Not Vaccinated - close contact, asymptomatic, waiting test	Quarantine (will need to quarantine for 5 days regardless of test results)
Vaccinated - close contact, asymptomatic, test negative	None	Not Vaccinated - close contact, asymptomatic, test negative	Quarantine for 5 days from date of exposure, continue to wear a mask
Vaccinated - close contact, asymptomatic, test positive	Self-isolate for 5 days from date of test, wear mask 5 additional days	Not Vaccinated - close contact, asymptomatic, test positive	Self-isolate for 5 days from date of test, continue to wear a mask
Vaccinated - close contact, with symptoms, waiting test	Quarantine pending test results	Not Vaccinated - close contact, with symptoms, waiting test	Quarantine (will need to quarantine for 5 days regardless of test results), return after no fevers and wear a mask
Vaccinated - close contact, with symptoms, test negative	Leave quarantine upon receiving test results / no fevers	Not Vaccinated - close contact, with symptoms, test negative	Quarantine for 5 days from date symptoms started
Vaccinated - close contact, with symptoms, test positive	Self-isolate for 5 days from date of symptoms, return after no fevers and continue to wear a mask	Not Vaccinated - close contact, with symptoms, test positive	Self-Isolate for 5 days from date of symptoms, return after no fevers and wear a mask
Vaccinated - no close contact, asymptomatic, waiting for test	None	Not Vaccinated - no close contact, asymptomatic, waiting test	None
Vaccinated - no close contact, asymptomatic, test negative	None	Not Vaccinated - no close contact, asymptomatic, test negative	None
Vaccinated - no close contact, asymptomatic, test positive	Self-isolate for 5 days from date of test and continue to wear a mask	Not Vaccinated - no close contact, asymptomatic, test positive	Self-Isolate for 5 days from date of test, continue to wear a mask
Vaccinated - no close contact, with symptoms, waiting for test	Quarantine pending test results	Not Vaccinated - no close contact, with symptoms, waiting test	Quarantine until test results are received. If negative, can end quarantine when symptoms resolve
Vaccinated - no close contact, with symptoms, test negative	Leave quarantine upon receiving test results / no fevers	Not Vaccinated - no close contact, with symptoms, test negative	Quarantine for until test results are received, return after no fevers and continue to wear a mask
Vaccinated - no close contact, with symptoms, test positive	Self-Isolate for 5 days from date of symptoms, return after no fevers and continue to wear a mask	Not Vaccinated - no close contact, with symptoms, test positive	Self-Isolate for 5 days from date of test return after no fevers and continue to wear a mask
